

Label Generation API

Print a Shipping Label for Your Jeebly Order

Version 1.0.9

What Is This API?

Once you have created an order and received an AWB number (tracking number), use this API to generate and download the shipping label for that order. Print the label and attach it to your package before the rider arrives for pickup.

API Details

Property	Value
Request URL (Demo)	https://demo.jeebly.com/customer/generate_shipment_label
Request URL (Production)	https://myjeebly.jeebly.com/customer/generate_shipment_label
HTTP Method	POST
Content-Type	application/json

Authentication Headers

Header Name	Description	Required
X-API-KEY	Your API security key	Yes
client_key	Your Jeebly customer account key	Yes

Request Body

Send one field in the request body:

Field Name	Description	Type	Example	Required
reference_number	The AWB / tracking number you received in the response when you created the order	String	"JB301234"	Yes

Sample Request

```
curl --location 'https://demo.jeebly.com/customer/generate_shipment_label' \
--header 'X-API-KEY: YOUR_API_KEY' \
--header 'client_key: YOUR_CLIENT_KEY' \
--header 'Content-Type: application/json' \
--data '{
  "reference_number": "JB301234"
}'
```

Responses

Success (200)

When successful, the API returns a label file (usually a PDF or image). You can save this file and print it to attach it to your package.

Error Responses (400)

1. If the format is wrong

```
{  
  "success": "false",  
  "message": "Invalid JSON format"  
}
```

2. If the API Key is not valid

```
{  
  "success": "false",  
  "message": "Invalid API Token"  
}
```

3. If the customer Key is not valid

```
{  
  "success": "false",  
  "message": "Invalid Customer Key"  
}
```

4. If the consignment is invalid

```
{  
  "success": "false",  
  "message": "Invalid Shipment Number"  
}
```

Error Message	What It Means	How to Fix It
Invalid JSON format	The request body is not valid JSON	Check the format of your request
Invalid API Token	Your API key is wrong or missing	Check your X-API-KEY header
Invalid Customer Key	Your client key is wrong or missing	Check your client_key header
Invalid Shipment Number	The reference number you entered does not exist	Make sure you are using the correct AWB number from order creation

Note: Make sure you create the order first and get the AWB number before calling this API. You cannot generate a label without a valid AWB number.
